EMPOWERED ELECTRIC | COMMERCIAL AND DESIGN BUILD ELECTRICIANS

JOB DESCRIPTION: JOURNEYMAN - FULL TIME

OUR STORY | OUR "WHY"

Empowered Electric has grown exponentially over the last three years. How? The answer is simple: we hire the most qualified electricians in the Kansas City metro area.

We've gone from "up-and-coming" to "here-to-stay" because the people we hire are a unique breed. Are they skilled at what they do? Absolutely. But what you'll see under "Qualifications" on the next page goes beyond the electrician trade itself.

We're looking for passion. We're looking for grit. We're looking for excellence.

If you exemplify those three qualities yet feel stagnant wherever you are, please apply and join a team who will push you to be better, encourage you to work harder and care about you and your family - inside and outside of work. There are many electrician companies out there. But Empowered Electric is different than them: When you pull the right wires while on our team, your career will explode.

We don't just care about your amazing skillset as an electrician. We care about your whole person.

Why should you ever settle for anything less?

We want you to succeed. And Empowered isn't done growing. We can empower one another along the way - that makes work worth getting out of bed every morning. **You in?**

SINCERELY,

THE EMPOWERED ELECTRIC TEAM

QUALIFICATIONS

You Don't Need to be Told What to Do. Some companies micromanage. That's not us. At Empowered, you should be able to independently install electrical materials for residential or commercial projects. In addition, you are ready to listen well and see tasks through to completion. Ideally, you have 3-5 years of experience, or you're on your second year and are a Journeyman wizard.

Flip on the "People Person" Switch. Obviously, you'll need to get the job done in an excellent and timely fashion. But when you work directly with service requests and customers, you make those people feel heard and taken care of - not frustrated and dumb.

Project Domination. We know bigger projects are a team effort. But you are able to handle, and lead, small-to-medium sized projects on your own or with a smaller team. You show up on time, take safety seriously and relentlessly pursue the task at hand.

An Emphasis on Mentorship. You are willing to learn from other quality electricians at Empowered. AND, you are willing to supervise apprentice electricians. We want to serve and grow future generations of Kansas City's premier Journeyman electricians.

Job Cost Reporting. As an industry necessity, you're comfortable reporting job cost information - both labor and material costs.

Adhere to Guidelines. In our pursuit of excellence, we don't mess around when it comes to OSHA regulations. Again, we care about all of you and wouldn't put you in a position to compromise safety.

Bonus Points. If you have Journeyman or ABC certification (or something similar), then you're ahead of the game. We also prefer OSHA 10-hour or 30-hour qualification. If you don't have any of these but still feel passionate and ready to inquire, please reach out to learn more.

DISQUALIFICATIONS

You're Comfortable Where You're At. If you have reached a point in your career where you're feeling content. That's great - if you're happy, why change jobs? But at Empowered, we will push you to be the best electrician possible. This means the climb will get tough at times, but it's because the last thing we want for you is to be content. Enhance your career at Empowered Electric.

You're Independent. To a Fault. We already mentioned you should feel capable in completing tasks by yourself. But if you consider yourself a "Lone Wolf," Empowered might not be the best place for you (even though "Lone Wolf" is a pretty sweet nickname). Our team looks after one another and pushes each other to do excellent work and grow in our craft.

You're Not Quite There. If you feel like Empowered is the place for you, but your skillset isn't ready for the ensuing tasks...we respect your honesty. We care about the drive to get better just as much as the skill itself. When both of those qualities align, let's start a conversation.
